

Miranda Wang, C'16 Bio

Miranda Wang is a climate tech entrepreneur who's building the most innovative plastic transformation company. She is the Co-founder and CEO of Novoloop, a low-carbon advanced recycling and sustainable materials provider that upgrades the most common plastic waste into performance materials worth up to 50x more. Miranda is a Forbes 30 Under 30, UN Young Champion of the Earth, and a Pritzker Environmental "Genius" Awardee. Outside of her startup role, Miranda lives in San José, CA with her husband Robert. She is an avid gardener with a keen interest in landscaping with nature. She graduated from the University of Pennsylvania.
